BUCKING THE SYSTEM WITH CREATIVE  
AND PEACEFUL ACOUSTIC PANELS

# 1. Bengle

product designer: Dominika Gulińska

is a **piece of furniture** that involves **sound absorbing material** that doubles up as a seat. Easy assemble and dismantle, the possibility of using it as a seat, bar stool, worktop or leg rest makes it an ideal solution when unexpected guests show up and you are running short on seating areas.

# 1. EcoPET Stellar

## 2. EcoPET Trigo

### 3. EcoPET Stilke

**Architected Sound x Bester Studio collaboration** is a perfect blend of natural and synthetic resources. **Natural wooden panels** create warm environment in the room, whilst the recycled EcoPET material provides warm and soothing sound in any place. This combination enables to implement hard surfaces while reducing noise at the same time.

## 1. Board

is a **sound absorbing panel** resembling a notice board and acting as one. It can get any shape, so it fits in kindergartens, classrooms, boardrooms or any kind of office. Due to its two-layer construction, it can have a single coloured finish, or a double coloured edge. Leave a note for your colleague and enjoy the silent environment.
