

Aco-ustic Painting is a sound-absorbing acoustic panel in the form of a picture, which can be ordered in the form of photo reproductions, graphics and paintings.

The artists we work with decided to entrust us with their art, so that it would gain a new usable dimension in the form of acoustic panels. They are available in various formats to ensure the desired soundproofing effect and to fully meet the aesthetic value of the room.

Aco-ustic Paintings make your spaces more cosy, comfortable and less noisy. Apart from being an excellent canvas for any piece of art, due to their unique construction they can absorb mid and high tones, making you feel calm, snug and safe as houses.
